

A close-up photograph of a manual coffee grinder. The clear plastic hopper is filled with dark brown coffee beans. The grinder has a black handle and a silver metal base. The background is a warm, orange-brown color with a pattern of coffee beans and stylized, white, wavy steam or smoke graphics. The brand name 'fracino' is printed in white in the upper right, and 'reastilino' is printed in white in the lower right.

Roastilino

*Fracino, the only UK manufacturer of Cappuccino and Espresso Coffee Machines, introduces the exciting and innovative Roastilino - Counter Top Coffee Roaster - as the latest addition to the extensive Fracino range of Coffee making equipment.*

In response to the increasingly sophisticated demands of the coffee culture the Roastilino takes Espresso to new gourmet heights.

The award winning Roastilino is a revolution in engineering enabling small quantities of green beans to be roasted on a bed of hot air in a glass chamber. The Roastilino has mesh covered vents to allow the delightful and enticing aromas of freshly roasted coffee to fill the air.

The roasting process is aesthetically pleasing as the beans dance in the hot air and turn from green to lightly roasted hazelnut to the deepest richest brown. This hypnotic sales tool is a must for any coffee bar or venue wanting to promote the skills and theatre of their barista and the excellence of the coffee menu.

### KEY FEATURES

- Constructed in top quality mirror finished stainless steel that shines like polished chrome.
- Manufactured using only the finest materials, the very latest machining methods and state of the art electronic and safety components.
- Roasting process uses fluid bed technology.
